Baar/Zug, 24 January 2023

InfoGuard expands into Germany and opens new branch in Munich

InfoGuard completes the next phase of expansion in Germany. The Swiss cyber security expert opens a branch in Munich to accommodate a strong growth in its customer base in the German market and to meet demand for Managed Cyber Defence and Incident Response Services.

For many years, InfoGuard has been offering comprehensive Managed Detection and Incident Response Services from its Cyber Defence Center (CDC) in Baar, Switzerland. The CDC is certified to the ISO/IEC 27001 standard and has ISAE 3000 Type 2 accreditation. The leading cyber security expert in Switzerland is now pressing ahead with the expansion plans and opened a branch in Munich in mid-January. This is based on a strong increase in demand for Managed Cyber Defence and Incident Response Services from Germany over the last two years. The newly founded company, InfoGuard Deutschland GmbH, will also focus on these areas.

This follows hot on the heels of the opening of the first foreign branch office in Vienna, as announced in December 2022. As in Austria, InfoGuard is already looking after numerous leading companies from industry and finance in Germany and has a number of successful partnerships, most notably with large insurance companies. InfoGuard already has several specialists working as Senior Incident Responders and in sales in Germany. Furthermore, InfoGuard is listed by the German BSI (Federal Office for Information Security) as a qualified APT Response service provider¹, which emphasises the high standard of InfoGuard's Cyber Defence and Incident Response Services.

"We are delighted to be taking the next step in our expansion strategy so soon after the opening of our new office in Vienna. We already serve a number of major customers in Germany, including those regulated by BaFin. We are sure that Germany has a massive potential for development for InfoGuard," explains Thomas Meier, CEO of InfoGuard AG.
